

# TOPICS

- TOPIC 01: Solid state pollutants and recycling.
- TOPIC 02: Advanced oxydation process in water treatment.
- TOPIC 03: Environmental engineering and green materials.
- TOPIC 04: Water security.
- TOPIC 05: Modeling and simulation processes in Environmental Engineering
- TOPIC 06: Hydrogen production with Solid state pollutants.
- TOPIC 07: Electrochemistry and environnement.
- TOPIC 08: Membrane and microalga technology in water treatment.
- TOPIC 09: Climate change and artificial rain

## IMPORTANT DATES

## SETIF - ALGERIA

07 - 08 OCTOBER 2025

# INTERNATIONAL WORKSHOP ON

# ENVIRONMENTAL ENGINEERING

## CONTEXT AND OBJECTIFS

Chemical and environmental engineering is a crucial field that merges the principles of engineering and chemistry to protect the environment and promote sustainability. This field has recently witnessed increasing attention, driven by growing environmental challenges such as climate change and pollution. Workshops on chemical and environmental engineering were recently held and achieved remarkable success. These workshops focused on diverse topics including water and air treatment technologies, sustainability methods in industry, environmental challenges in the region, and the role of chemical and environmental engineering in achieving sustainable development. These workshops attracted wide participation from various sectors, including university and institute students, engineers and researchers, representatives from the public and private sectors, and civil society organizations.

SPONSORS

## HONORARY CHAIRMAN

**Prof. Mohamed EI Hadi LATRECHE**

– Rector of the University

**Prof. HABELHAMES Farid** Dean of the Faculty of Technology

## CONFERENCE CHAIRMAN
